# Picking fingers

**F**ifty years experience makes one of the most important manufacturer of rubber fingers for plucking. Fingers are produced by modern equipment, only with prime natural rubber, no synthetics and tested materials which provide high flexibility, long resistance and performance. Production covers a wide range of fingers, offering the right solution to each operation of the plucking process and products suitable for every customers plucking plant.

main strength lies in its tradition of fifty years in the picking fingers field and to Portaluppi Rubber adding value means being able to satisfy every customer's demand or need: from those who require flexibility and softness for the most delicate works during the plucking process to those who are looking for strongness and hardness with a special gentle touch for a great picking performance without any skin abrasion. In any case, resistance and long durability are always assured and guaranteed: not only from tests but from our customers.

provide every hardness requested, every fingers colour needed.

## PRODUCT SCHEDULE

All item described are not only available in the standard

<b>SH 45</b>	very soft
<b>SH 50</b>	soft
<b>SH 55</b>	medium
<b>SH 60</b>	hard
<b>SH 65</b>	very hard

compounds, but can also be supplied to suit customer's individual needs.

Mixture is based exclusively on natural, first quality rubber from Malaysia with hardness 45 to 65 shore A.

Picking fingers should be stored in fresh room, away from heat sources. Picking fingers worn out are equal to special urban rubbish. Our products are in conformity with the E.U. and U.S.A. laws' standards - **F.D.A. approved.**

Color: produced in black, on request in yellow or red or others.

## 847

Fitted to STORK  
- BARKER - GORDON JOHNSON  
- GAINESVILLE  
- ASHLEY pickers.

The strong profile and special head design give it a better hold in the disk and more strength and hardness, ensuring excellent high-speed picking in heavy duty conditions.

## 144

Fitted to LINCO  
- SYSTEMATE - MEYN  
- GORDON JOHNSON  
- CANTRELL  
- JM PLANTS - BAYLE  
- HORTY machines.

Round finger with delicate spirals that ensure maximum flexibility and excellent picking performance without damaging the skin. A very special finger for chicken and turkeys.

## 2020 V - 2020 N

Fitted to STORK  
- S.B. IMPIANTI - CATTARUZZI  
- PATRINI - GORDON JOHNSON  
- GAINESVILLE  
- BARKER machines.

An oval finger designed for long life, with excellent turkey picking performance.

## 133

Fitted to STORK  
- MEYEN

A round finger whose special profile and singular shape of the finger's head and neck giving excellent picking performance on disc machine.

## 3112

It fits LINCO  
- SYSTEMATE  
- MEYN  
- GORDON JOHNSON  
- CANTRELL  
- JM PLANTS  
- BAYLE - HORTY machines.

A round finger with delicate spirals ensuring maximum flexibility and excellent picking performance without damaging the skin.

## 1320

It is fitted to STORK  
- LINCO - MEYN  
- GORDON JOHNSON  
- CANTRELL processors.

This oval, thin profile finger gives greater flexibility and softer contact on poultry skin, meaning more delicate picking and a softer touch. The careful design ensures long duration and stability in the disk. Excellent for fresh picking and where "yellow bird" is required.
